[RUN_FASTLANE]

[RUN_FASTLANE] Looks like fastlane ran into a build/archive error with your project

[RUN_FASTLANE] It's hard to tell what's causing the error, so we wrote some guides on how

[RUN_FASTLANE] to troubleshoot build and signing issues:

https://docs.fastlane.tools/codesigning/getting-started/

[RUN_FASTLANE] Before submitting an issue on GitHub, please follow the guide above and make

[RUN_FASTLANE] sure your project is set up correctly.

[RUN_FASTLANE] fastlane uses `xcodebuild` commands to generate your binary, you can see the

[RUN_FASTLANE] the full commands printed out in yellow in the above log.

[RUN_FASTLANE] Make sure to inspect the output above, as usually you'll find more error information there

[RUN_FASTLANE]

[RUN_FASTLANE] [!] Error building the application - see the log above

[RUN_FASTLANE] Error: The "Run fastlane" step failed with an unknown error. Refer to "Xcode Logs" below for additional, more detailed logs.
